Data

Address All Factors That Affect Health

Health tied to:

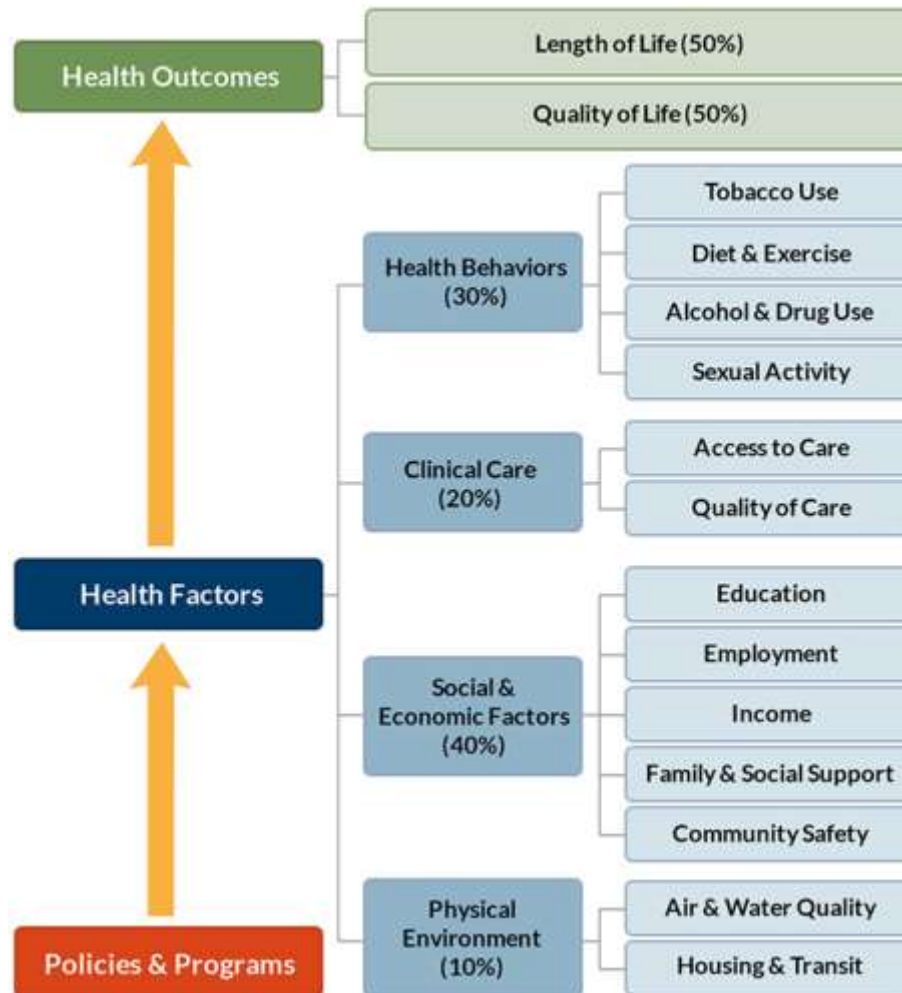

- How much money people make
- How much school they've completed
- Neighborhoods they live in

The choices we make are
based on the choices we have

Many Factors Affect Health

County Health Rankings model © 2014 UWPHI

Disturbing Facts

- 1/3 of kids are either overweight or obese
- 75% of 17- to 24-year-olds are ineligible to serve in the military
- One of every two deaths in America is linked to chronic disease

...Including School Nurses

Example: Community Health Initiative

- Nurses took a hospital accreditation community needs assessment and used findings to create a partnership
- Nurse-led coalitions address greatest needs

Example: School Wellness Committee

- School nurses across the nation are leading wellness initiatives
- Partnerships are forming with community leaders, parents, students, health and PE teachers, food services, mental health care, and health services

Example: In-School Clinics

- School nurses bring health care to the people
- Partnering with dentists, optometrists, mental health care agencies, local health departments, and local health care providers allows most vulnerable populations access to care

Example: Educate future partners

- School nurses speak to future teachers, administrators, nurses, health educators, health care professionals, police officers, and politicians
- Framework displays value of school nursing leadership, collaboration, and data

Framework for 21st Century School Nursing Practice™

NAN's Framework for 21st Century School Nursing Practice (the Framework) provides structure and focus for the key principles and components of current day, evidence-based school nursing practice. It is aligned with the Whole School, Whole Community, Whole Child model that calls for a collaborative approach to learning and health (ASCD & CDC, 2014). Central to the Framework is student-centered nursing care that occurs within the context of the students' family and school community. Surrounding the students, family, and school community are the non-hierarchical, overlapping key principles of Care Coordination, Leadership, Quality Improvement, and Community/Public Health. These principles are surrounded by the fifth principle, Standards of Practice, which is foundational for evidence-based, clinically competent, quality care. School nurses daily use the skills outlined in the practice components of each principle to help students be healthy, safe, and ready to learn.
